

"The creation of the Romanian painter Emil Ciocoiu impresses at first contact with the strong emotional vibrations it induces, by the philosophy of colors, ample and subtly affecting the whole being, connecting naturally and spontaneously with the purest cosmic vital energy.

The solar chromatic of Emil Ciocoiu art induce positivism, peace and universal harmony, transforming you into someone stronger, more stable and more confident in the eternal existential.

The spiritual dimension of the Romanian painter's creation, his uniqueness, generates healthy and deep optimism, placing the Self in harmony and consensus with the Universe .

It is an intense and complex joy to know and see a Romanian, Emil Ciocoiu, that everywhere on Earth where he made known his creation, it generates aesthetic fulfillments, openings to consistent intercultural dialogue, visions and vibrations of high intellectual and spiritual strength.

Here are some reasons why I felt that the opening of an exhibition of the work of Emil Ciocoiu here in Bucharest , capital of Romania, the country where he was born and trained , is not only a blessing, but also a patriotic and moral obligation. This is an essential and mandatory step for the highlight of true values of the Romanian spirituality, in a just recognition as it should and as they deserve, at national and global level.

Welcome home, Master! "
